

ARCHAEOLOGICAL FIELD TECHNICIANS (UTAH)

Harris Environmental Group (HEG) is looking to hire Archaeological Field Technicians for multiple cultural resources survey projects in Utah and other southwestern areas.

Job Duties and Responsibilities:

Crews will primarily be working eight day sessions, Thursday to Thursday, at 10-hours per day, followed by six days off (8 on/6 off).

Field Technicians are responsible for assisting the Crew Lead in identifying and recording cultural resources in the field. This includes identifying and documenting all types of regional artifacts and features, thoroughly filling out appropriate site forms, site/artifact photography, navigating survey transects with Garmin GPS, and mapping sites using Trimble GPS.

HEG offers competitive pay and per diem.

Job Qualifications:

Ability to work in hot or cold conditions, inclement weather, and remote locations (required)

Ability to hike up to 10 miles a day in rugged terrain while carrying up to 30 lbs. of gear/water (required)

Accredited field school (preferred)

At least 6 months of experience in CRM pedestrian survey (preferred)

Proficiency with basic Garmin GPS devices and familiarity with Trimble GPS (Terrasync) (preferred)

Skill using digital tablets for site recordation (preferred)

Experience identifying and documenting prehistoric and historic artifacts and features (preferred)

To apply, please send cover letter with date of availability and resume with references to:
